Date / customer approval signature

\*ABB uses software with reliable and effective mechanisms for the embedment of signatures in PDF documents with simultaneous storage of the biometric data resulting from the signature. The solution is equipped with mechanisms which make a subsequent amendment of the document detectable. (TÜV test mark "Approved Software")

ABB general conditions apply to all offers and orders from or to our company and all agreements made with our company. At your request, a copy of the conditions relevant to you will be sent to you immediately.
